Boston, MA (Open To Relocation) | (617)-792-6908 | lopes.o@northeastern.edu | [LinkedIn](#) | [GitHub](#)

Summary

Business Analyst with 4+ years of experience performing business process analysis, requirements elicitation, needs assessment, workflow analysis, reporting, and system implementation support across financial services and supply chain environments, including hands-on experience building and maintaining Workday reports using Report Writer and calculated fields. Skilled at translating business and user needs into functional specifications, user stories, acceptance criteria, reports, workflow automation, and data-driven solutions. Experienced partnering with technical and non-technical stakeholders to improve operational efficiency, data integrity, system performance, and reporting accessibility. Hands-on experience with Tableau, Power BI, SQL, Excel, SharePoint, Teams, ServiceNow, Jira, Confluence, workflow automation, AI tools, prompt engineering, and Agile/Scrum delivery.

Experience

ServiceNow

Feb 2026 - Present

Business Systems Analyst

Remote

- Orchestrated Agile sprint planning, backlog prioritization, and stakeholder alignment for 4 cross-functional delivery teams, accelerating feature deployment velocity by 33% while maintaining 97% on-time release adherence
- Engineered detailed BRDs, FRS documents, user stories, and acceptance criteria for API integration and automation projects, decreasing requirement ambiguities by 48% and minimizing rework during UAT cycles
- Automated recurring financial reporting workflows using MySQL, SQL, Excel Power Query, and Excel macros, partnering with finance and business stakeholders to map current-state processes, define system requirements, and optimize month-end and quarter-end workflows, reducing manual effort by 40%
- Collaborated with business stakeholders, vendors, and IT operations teams to execute risk assessment and change management strategies, reducing production incidents by 29%
- Supported AI-enabled analytics and automation initiatives by applying prompt engineering, LLM, and RAG concepts to business workflows while considering data security, governance, access controls, and responsible adoption

Atlas SP

Jan 2025 - Aug 2025

Data Analyst Co-op

New York, NY

- Gathered and documented business and functional requirements for financial reporting workflows, conducting stakeholder interviews and needs assessments, analyzing AS-IS/TO-BE processes, and translating business needs into functional specifications and acceptance criteria
- Facilitated stakeholder discussions for AUM and portfolio-performance reporting, analyzing financial-index and portfolio trends, investigating variances, and presenting recommendations supporting lending and risk-management decisions
- Designed and supported Tableau dashboards and automated reporting workflows, defining KPIs and data mappings across Snowflake datasets, cutting reporting turnaround time by 20% and enabling faster, data-driven business decisions
- Created strategic business cases, Functional Requirement Specifications (FRS), and Standard Operating Procedures (SOPs) in collaboration with finance and risk stakeholders, reducing deployment time by 20% through effective sprint planning, thorough regression cycles, and comprehensive test case coverage for financial reporting platform releases
- Conducted market research and competitor analysis across financial-services industries, informing investment and risk-management decisions, while managing incidents and tracking system performance using JIRA and ServiceNow to ensure timely follow-up and issue escalation

Zyphron Industries

Jul 2020 - Aug 2023

Junior Business Analyst

Mumbai, India

- Facilitated requirements-gathering sessions with supply chain leadership, performing business process analysis and needs assessments to translate stakeholder needs, business rules, and functional reporting specifications into Power BI models with DAX
- Built and maintained Workday reports using Report Writer and calculated fields to support recurring supply chain and vendor-management reporting needs, partnering with business stakeholders to translate reporting requirements into accurate, reusable report objects
- Analyzed supply chain, inventory, fulfillment, and vendor-onboarding processes to identify workflow inefficiencies, reporting gaps, and operational dependencies, translating findings into process improvements that strengthened visibility across business teams
- Analyzed historical inventory, demand, and order data to identify seasonal demand patterns and stockout drivers, developing reporting and forecasting dashboards that reduced inventory shortfalls by 20%
- Supported UAT, system implementation, troubleshooting, and user support for enterprise reporting solutions, validating requirements and outputs, documenting defects, coordinating issue resolution, and monitoring data integrity before go-live

Skills

Business & Product Management: Business Analysis, Technical Business Analysis, Product Ownership, Product Lifecycle Management, Stakeholder Management, Requirement Gathering, BRD, FRS, User Stories, Acceptance Criteria, Gap Analysis

Agile & Project Delivery: Agile Methodologies, Scrum Framework, SDLC, Agile SDLC, Workflow Optimization, Process Improvement, Change Management, Risk Assessment, Incident Management, Vendor Coordination

Data Analytics & Reporting: Data Analysis, KPI Reporting, Dashboard Development, Data Visualization, Reporting & Reconciliation, Financial Tracking, Market Research, Data Reconciliation, Operational Efficiency Improvement

Technical Skills: SQL, REST APIs, API Integration, Workday Report Writer, Power BI, Advanced Excel, JIRA, ServiceNow, Confluence, Microsoft Office Suite, System Monitoring, Application Support, IT Operations Support, Process Automation, AI-Assisted Productivity Tools

Documentation & Operations: SOP Creation, Documentation Management, Business Process Mapping, Root Cause Analysis, Decision-Making, Problem Solving

Soft Skills: Communication Skills, Presentation Skills, Leadership, Team Collaboration, Client Relationship Management, Analytical Thinking, Time Management

AI & Automation: LLMs, RAG, LangChain, AI-Assisted Analytics, Prompt Engineering

Education

Northeastern University, USA

Dec 2025

Master of Science, Information Systems

- Coursework: Big Data and Intelligent Analytics, Data Architecture and Business Intelligence, Data Science Methods and Tools

University of Mumbai, India

Jun 2021

Bachelor of Technology, Information Technology

- Coursework: Data Mining and Business Intelligence, Database Management, Cloud Computing Services

Projects

RAG Job Assistant | GitHub

May 2025

- Built a production-grade RAG pipeline indexing 5,000+ job postings into ChromaDB with HuggingFace embeddings for semantic search, integrating LangChain and Groq API (Llama 3.3 70B) for answer generation

Customer Churn Insights | GitHub

Dec 2024

- Built a churn prediction dashboard using XGBoost (AUC 0.824) with SHAP explainability on the IBM Telco dataset, featuring an interactive What-If simulator with ROC/PR curves for retention scenario modeling and at-risk customer identification
